

INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, AUGUST 3, 2001 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Four new large fires were reported, two in Southern Area, and one each in Northern Rockies and Eastern Great Basin Areas. Two large fires reached containment, one in Northern Rockies and one in Eastern Great Basin Areas. Initial attack activity was light nationwide. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Nevada, New Mexico, Oregon, Utah, Washington and Wyoming.

ROCKY MOUNTAIN AREA LARGE FIRES:

ELK MOUNTAIN COMPLEX, Black Hills National Forest. A Type 2 Incident Management Team (Hartman) is assigned. A Type 1 Incident Management Team (Hart) will transition today. This complex of fires consisting of Elk Mountain 2 and Rogers Shack, is ten miles southeast of Newcastle, WY. Significant runs occurred with crowning, torching and spotting up to 1/4 mile. Evacuations occurred in the Pass Creek Road area and U.S. Highway 16 was closed due to smoke. A historical cabin was destroyed at the Elk Mountain Lookout.

DUCK CREEK, Rawlins District, BLM. This fire is 35 miles west of Wheatland, WY. Containment efforts are being impeded by shifting winds, steep terrain, beetle killed fuels, and lack of access. Burnout operations were successful. Containment lines are holding.

DINWOODY, Shoshone National Forest. This fire is located in the Fitzpatrick Wilderness 22 miles south of Dubois, WY. The fire is burning in rocky terrain with scattered pockets of timber.

MAD CREEK, Routt National Forest. This fire is in the Mount Zirkel Wilderness Area, 11 miles north of Steamboat Springs, CO. A new spot was located within a large patch of blow down. The potential for additional spotting and spreading within the heavy blowdown is a containment concern. Rehabilitation along the fireline is progressing.

WEST PLATEAU, San Juan National Forest. This lightning caused Wildland Fire Use fire is 20 miles northeast of Dolores, CO. Minimal activity was observed due to light precipitation that was received. High relative humidity and cloud cover continues to keep fire activity minimal.

ECKLUND COMPLEX, Little Snake Field Office, BLM. A Fire Use Management Team (Cones) is assigned. This complex of lightning caused Wildland Fire Use fires is in the Diamond Breaks Wilderness Study Area, 50 miles east of Vernal, UT. This will be the last report unless significant activity occurs.

NORTHERN ROCKIES AREA LARGE FIRES:

ARTHUR, Yellowstone National Park. A Type 1 Incident Management Team (Frye) is assigned. This fire is 55 miles west of Cody, WY. Evacuation of the east entrance remains in place and the east entrance road remains closed. Crews made significant progress along the northwest and southwest flanks. The fire has spread to the northeast and is within 1/2 mile of the east entrance and the Shoshone National Forest boundary. Spotting onto the forest was observed late yesterday afternoon. HOPPE, Gallatin National Forest. A Type 2 Incident Management Team (Hoff) has been ordered. This fire is 10 miles north of Gardner, MT. Resources have been pulled off the fireline due to safety concerns.

SMALL, Northern Cheyenne Agency, BIA. A Type 2 Incident Management Team (Corbin) is assigned. This fire is 10 miles southwest of Busby, MT. Crews continue to make progress on fireline construction and mopup. Burnout operations are being conducted to reinforce fireline.

OUTLOOK:

*** A RED FLAG WARNING HAS BEEN POSTED IN WESTERN AND CENTRAL WYOMING FOR A COMBINATION OF HOT, DRY, WINDY WEATHER ALONG WITH ISOLATED DRY THUNDERSTORMS ***

*** A FIRE WEATHER WATCH HAS BEEN POSTED IN NORTHEAST WYOMING AND SOUTHWEST SOUTH DAKOTA INCLUDING THE BLACK HILLS FOR HOT DRY WEATHER ALONG WITH ISOLATED DRY THUNDERSTORMS ***

High pressure over the central United States is circulating moisture through portions of the Great Basin and Rocky Mountain areas. This will bring partly cloudy conditions with scattered thunderstorms, showers and wet thunderstorms over Utah and Colorado. A few dry thunderstorms are possible over Idaho, Wyoming and South Dakota. High temperatures will be in the 70's in the mountains with 90's expected for the lower elevations. Minimum relative humidity will range from 15 to 30 percent, except for 10 to 20 percent in Idaho and northern Utah. Winds will be southeast to southwest at 10 to 20 mph, with gusts up to 30 mph across western Wyoming.

An upper ridge over the central United States and an upper level trough along the Pacific coast will give a dry southwesterly flow to the Northern Rockies. This will bring partly cloudy skies with a chance of isolated thunderstorms in the Rockies. High temperatures will be 85 to 95 west, and 90 to 105 east. Minimum relative humidity will range from 15 to 25 percent in the western sections, and 10 to 20 east. Winds will be southwest at 10 to 20 mph, and up to 30 mph along exposed ridgetops.

An upper level trough and an associated weak cold front will swing into the Pacific Northwest. This will bring partly to mostly cloudy skies with some light rain or showers to western Washington and northern Oregon. The possibility of widely scattered thundershowers exist east of the Cascades. High temperatures will be in the 60's and 70's west of the Cascades and mostly in the 80's east of the Cascades, and into the 90's in southeast Oregon. Minimum relative humidity will range above 50 percent west of the Cascades, 20 to 30 percent east and 8 to 16 percent in southeast Oregon.
